REVOLUTIONIZING PPE FOR GLASS MANUFACTURING

Cut A9 Garments up to 30% Lighter
Gloves that Last 6X Longer
Unmatched Service & Savings

MAGID

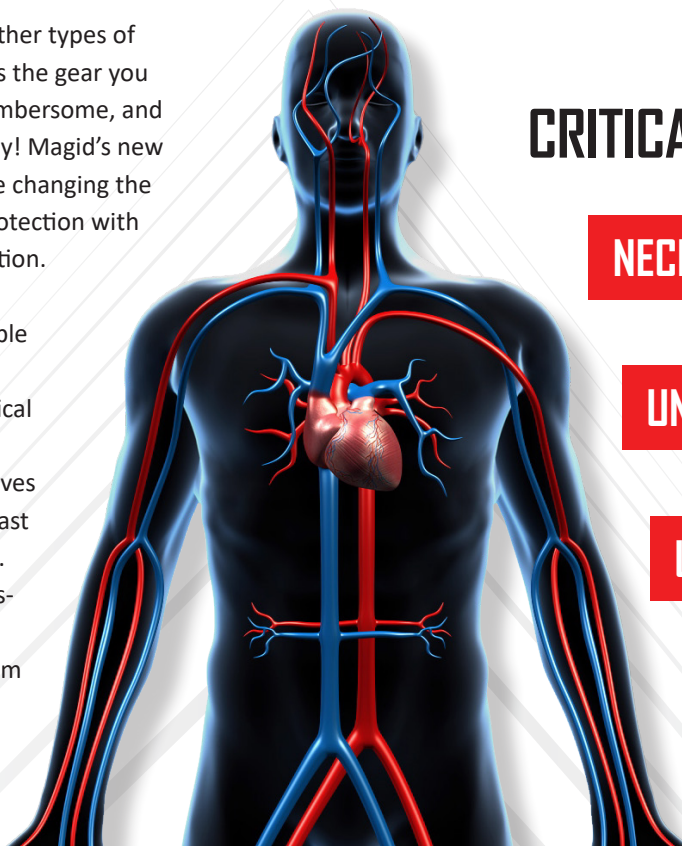

Safety at work®

PROTECTIVE GARMENTS

BEST-IN-CLASS PROTECTION FOR A DANGEROUS JOB

Glass work is more dangerous than other types of manufacturing. Too often, that means the gear you need to keep people safe is bulky, cumbersome, and hot. But it doesn't have to be that way! Magid's new PPE innovations for glass handling are changing the game to offer the highest levels of protection with unmatched comfort and range of motion.

Our revolutionary M-GARD® breathable garments are up to 30% lighter than competitive products and deliver critical ANSI Cut Level A7-A9 protection at a great value. We've also innovated gloves for each step in the value chain that last up to 6X longer than the competition. These gloves feature a variety of glass-specific coatings that are designed to protect both the hands that wear them and the products they're handling, including glass marring prevention and butyl adhesion resistance.

HAND PROTECTION

Finding flexible gloves that won't smudge glass, but that still provide enough cut resistance to keep workers safe isn't easy. Magid innovated an entire line of gloves that deliver a combination of high cut resistance, dexterity, and glass-industry-approved coatings that no other solution on the market can beat!
